

## Midwinter Virtual Conference 2021

**Questions and links from Session 5: Evidence Based Decision Making with LibInsights, by Sharon Whitfeld (Rider University)**

**Q1. What exactly is SUSHI?**

<https://www.projectcounter.org/code-of-practice-sections/sushi/>

**Q2. When I looked at LibInsight (when it first came out), the price was impossible to justify. It was a new product with no track record. So, a few questions related to that:**

- 1. Has the price come down enough to have a good ROI? Is it a cost-effective solution?**
- 2. A sort of meta-question: have you used LibInsight to justify its own cost?**

To Question 2: I really have not had to do so, but I definitely could. Without LibInsights, I would be a less efficient employee. I would have more difficulties determining what resources need more attention.

**Q3. Related to COUNTER: what reports does it support? Originally, it was only journal reports, JR1 and (maybe?) JR4 (COUNTER release 4). Does it support COUNTER 5? Does it support more than just journal reports?**

It does support COUNTER 5.
